

GD260 assignment #1

Establish a basic mockup for your first site.

You will be creating a three page site. The content of this site is up to you. Spend some time figuring out what you want the site to be about. Establish a color palette for your site. Do a basic mockup of one of the pages for the site. Make the mockup representative of the basic site look.

You will turn in

- **A folder of source images**, images that give some clue or direction of the look of your site. Or images that are used in the creation of the mockup of your site
- **A photoshop file** that shows the basic mockup of your site. The photoshop file should be 960 pixels wide and between 500 and 900 pixels tall. Your layers should still be intact.

Both of these items will be in a folder called **classLastnameCNCPT**
(example:GD260sullivanCNCPT)

This folder is what you will turn in before the beginning of class next week.
