MM137 assignment #1

You will create thumbnail images that show the underlying structure of three websites that you find interesting. These thumbnails should be descriptive of the underlying structure of each of those sites. If necessary, provide additional text explanation. You should also include the written web address for each example. Once you have compiled all this information, you will scan in the final page(s).

Specifications:
- Scan @ 200 dpi, save as JPG or TIF file format
- Use Adobe Bridge and Output to .pdf file
- Follow the naming convention, *Lastname*AS01.pdf. For student John Smith, the file would be called smithAS01.pdf.
- Place your completed file in my Drop Box on the Faculty Drive (Faculty Drive->jsullivan->Drop Box)
